

ACCESSORIES

chain, eyebolts & reflective tape

A range of standard accessories is available to adapt Furnitubes bollards for other uses.

Eye bolts can be fitted to bollards and used in conjunction with **Split Links** and **Chain Links** to more effectively define area boundaries.

Reflective Tape provides enhanced visibility in poor lighting conditions and at night to enable vehicles to navigate more safely through routes that are demarcated by bollards.

Reflective tape is available in a range of colours and can be fitted to many bollards at positions to best suit the application.

Alternative colours, grades and widths can be provided upon special request. Contact a member of our Sales Team for advice, availability and prices.

◀ **GUNNER**
with eye-bolts & spiked chain link supplied to Canterbury Cathedral, Kent

TECHNICAL

FB14 padlock

The fire brigade are equipped with master keys that allow them to unlock the distinctive yellow FB14 padlock during an emergency, rather than having to cut through the bollard. Furnitubes are able to offer these upon request.

Note 1

Chain

When calculating meterage requirements, remember to take into account the extra length required to allow for the 'sagging' of the chain.

Note 2

Reflective Tape

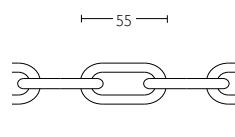

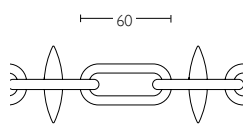

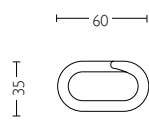

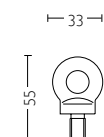

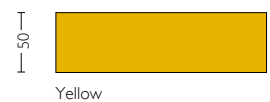

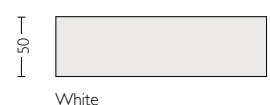

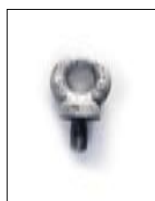

We do not recommend that tape is fitted onto primed bollards. Finish painted / stainless steel surfaces are preferred. Adhesion cannot be guaranteed if supplied loose.

Colours

The tape colours shown here are a guide only and may not match the actual reflective colours.

Product Codes are in **bold type**. Dimensions are in mm, are approximate and do not form any part of the contract.

We reserve the right to change the design and specification on any item offered and, where possible, notification will be made.
