

SMOKING

products

Areas used by smokers can often become messy with unsightly cigarette butts littering the ground. Furnitubes range of ash waste solutions tackle this problem.

FREQUENTLY ASKED QUESTIONS: 2007 SMOKING BAN

Introduction to the ban

Summer 2007 saw a total ban on smoking in all enclosed public spaces in the UK. The aim of the ban is to create smoke-free places and to protect workers and the public from the harmful effects of passive or secondary smoke. It is now against the law to smoke in virtually all 'enclosed' and 'substantially enclosed' public places and work places.

Which places must be smoke-free?

The ban affects most public premises, including restaurants, pubs, bars, shops, cinemas, shopping centres, leisure centres, offices, factories and other enclosed work places and public transport. No-smoking signs must be displayed in all smoke-free premises and vehicles. Staff smoking rooms and indoor smoking areas are no longer allowed, so anyone who wants to smoke has to go outside. Managers of smoke-free premises and vehicles have legal responsibilities to prevent people from smoking.

Do I have to create a smoking area?

Providing a smoking area is not a legal requirement, however, employers should consider the effects of not doing so, for example, infringement of Health & Safety regulations or creating littering problems. Local Environmental Health officers can be contacted for further advice regarding compliance with smoking regulations.

What are the penalties for breaking the Smoking Ban?

Those who do not take 'reasonable' actions to prevent smoking on their premises are liable to a £2500 fixed penalty fine, failing to display no smoking signs will result in a £200 fine, and those individuals who are caught smoking will receive a £50 fine.

How can I provide a smoking area for employees?

Installing a smoking shelter is the ideal way to provide outside cover for smokers. Smoking shelters must adhere to specific regulation to ensure it does not constitute an enclosed or substantially enclosed space. 50% of the wall area must be open to the air. Also, the shelter must not have any objects such as a hedge or barrier closer than 1.5m from the structure or have an open side against another wall, as this will obstruct the flow of fresh air into the shelter.

Why a distance of 1.5m?

A distance of 1.5m ensures there is adequate ventilation of the structure and the flow of fresh air is not impeded, although this distance is only a guideline. Each location would need to be assessed on its individual circumstances. Barriers to the free flow of fresh air may include; trees, hedges, walls or fences.

Can shelters have windows and doors?

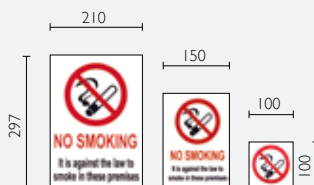

Windows and doors do not provide an effective means of ventilation and should not be considered. The only way this can be achieved is to have areas of the shelter open to the outside air.

To meet your smoking area needs, Furnitubes supply a range of ash waste bins and smoking shelters with 50% of the wall area open to air. buy online NOW at www.cigarettebinsuk.co.uk

NO SMOKING SIGNS

Furnitubes now offer self-adhesive 'No SMOKING' signs in three different sizes.

SMOKING SIGNS

White Adhesive No Smoking Signs
Available in Three Sizes
297 x 210 mm (A4)
210 x 150 mm (A5)
100 x 100 mm

LIVERPOOL RANGE

The clean lines of the Liverpool range complements all environments. The ash waste bins are available wall mounted or freestanding to suit all your ash waste needs.

Fitted with a cast iron base, the freestanding **Liverpool 210** ash waste bin requires no installation in secure areas. For non-secure areas, the ash bin can be fixed to the ground.

The wall mounted **Liverpool 250** ash waste bins are available in powder coated steel or in stainless steel.

TECHNICAL

Material
Furnitubes stainless steel cigarette ash waste bins are 100% recyclable.

Cigarette Stubber & Internal Ash Tray

Many of our litter bins can be adapted with an integral stubber and internal ashtray - see pages 214-215, 221, 229 & 236-237 for further examples.

Powder Coating

The Liverpool range is available powder coated in a large range of BS/RAL colours.

For further information on paint finishes see pages 337-339.

ASHBY RANGE

The Ashby range of ash waste bins cater for areas where a floor mounted ash waste bin is not possible. These steel designs can be wall or post mounted, and are ideal for a variety of locations.

▼ ASHBY 380

The stainless steel body of the Ashby 380 ash waste bin resists damage from stubbed cigarettes and from the elements.

Furnitubes now offer a slimmer powder coated version, the **Ashby Slimline** that can be either wall or post mounted. Also available in stainless steel.

▲ red powder coated liner and with optional corporate crest

▲ ASHBY SLIMLINE Post Mounted with red liner

- long narrow design ensures quick & effective extinguishing
- two litre capacity easy to remove, empty and clean
- channel bracket on rear allows for banding onto any post diameter (banding not included)

► ASHBY SLIMLINE Wall Mounted stainless steel version supplied to Aintree Race Course

- 2 litre capacity zintec liner
- stubber plate
- cut out smoking symbol
- powder coated zintec body
- catch prevents door falling completely open

▲ ASHBY - Wall Mounted shown with optional Zintec self-finish liner

TECHNICAL

WHAT IS ZINTEC?
Zintec is a thin layer of steel that has been electrolytically coated with a thin layer of zinc. This provides more protection against corrosion than standard uncoated steel.

Smoke King

RANGE

▲ SMOKE KING Bolt Down
in use, as supplied to Sloop Inn, Wootton, Isle of Wight

The Smoke King is cleverly designed to cut off the air supply to burning cigarettes that are placed within it, thus extinguishing them without the need for an external 'stubber' plate.

The cast aluminium Smoke King has been designed to sympathetically blend in with existing bollards and architecture, and is available in a floor or wall fixed version. Both designs are fully lockable.

▲ SMOKE KING Bolt Down

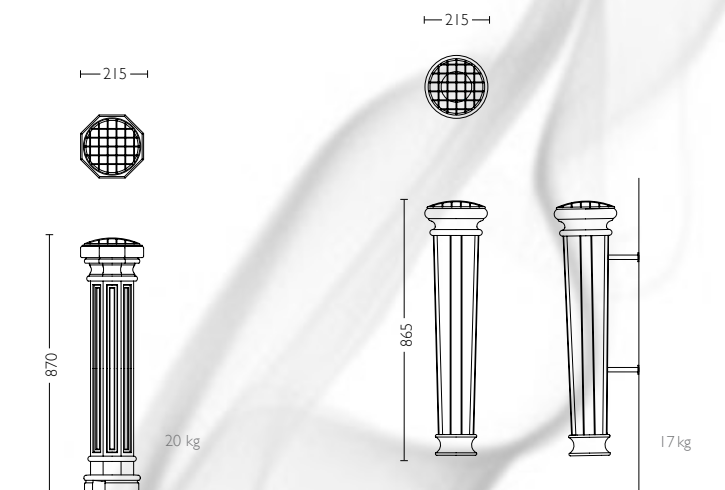

- designed to cut the air supply to cigarettes, extinguishing them without the need of a stubber
- traditional design
- extinguishes cigarettes efficiently
- cast aluminium body
- 3.5 litre capacity
- galvanised steel liner
- other BS/RAL colours available
- push lock

▲ SMOKE KING Wall Mounted
as supplied to The Buckingham Hotel, Buxton, Derbyshire

▲ SMOKE KING Bolt Down
liner

TECHNICAL

Additional Keys
Additional keys are available on request.

Smoke King Finish
These cast Smoke King bollards are wet sprayed in black as standard with a galvanised steel liner. Full range of BS/RAL colours are available. For further details refer to pages 337-339.

Note 1

Fixing Kit
A fixing kit is available for mounting to concrete surfaces only.
