Furnitubes is a leading company in the innovative design and manufacture of street and amenity furniture. Assured to ISO 9001:2000 for the design and quality of its products and services, Furnitubes offers a comprehensive range of street and landscape furniture, enabling planners and architects to design co-ordinated street schemes based on standard product ranges.

FURNITUBES

MISSION STATEMENT

At Funitubes International we are committed to:

Complete Service

Funitubes offer the complete street furniture service, encompassing design, development, manufacture and supply.

Our dedicated team of professionals are on hand to assist you at every step of your enquiry, and we pride ourselves on providing you with the quickest response.

Guaranteed Cost Effective Products

We offer quality dependable products at competitive prices and all our products are guaranteed. Available in a variety of materials including, cast iron, cast aluminium, steel, stainless steel, timber, plastic and G.R.P, we have a product to suit your every requirement.

Corporate Identity and Individual Needs

The products featured within this brochure are offered as standard, but items can be tailored to meet your individual requirements by use of corporate logos, crests and colours.

Delivery

We hold many of our standard items in stock, so we can deliver the items you need, when you need them! We operate both nationally and internationally and can deliver the products you want to your door, wherever in the world.

Quality

Recognised through accreditation to ISO9001:2000 Through communication, effective staff training and investment in Information Technology, earning us repeat orders worldwide from thousands of satisfied customers.

Environment

Working in accordance with and maintaining the environmental management system ISO 14001:2004.

“ I have worked with Funitubes over many years and found they always come up with solutions that work and are a real pleasure to work with in a true partnership. ”
Robin Cooper, Director of Regeneration and Development
Medway Council

“ It's always been a pleasure to work with the Funitubes 'family', which I have been doing for over 20 years now. Their flexible approach and attention to detail, with a ...'what if...' and a .. 'can do' attitude have inspired some of the designs and creations that have brought us critical acclaim. Their technical know-how and ability to listen to clients' often exacting requirements are second to none. ”
Patrick Phillips, Head of Parks and Recreation
London Borough of Bromley

THE COMPLETE SERVICE

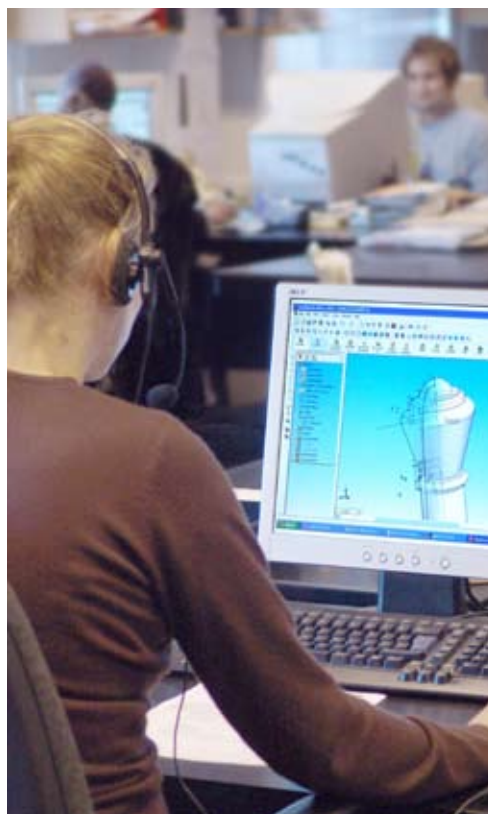

Sales and Marketing

The Sales Department should be your first point of contact for enquiries regarding design, estimating, production schedules and purchasing requirements. Furnitubes International's offices are staffed by a dedicated and experienced team who will be happy to take calls and enquiries concerning estimates, orders, and product information. Employees are trained to high standards and all enquiries, large or small, are given immediate attention.

A fully-networked M.R.P database logs all quotations and customer details to allow direct access to current stock levels and prices, thus saving time and avoiding duplication and mistakes. For professional advice on specifying or developing your design ideas, meeting budgets, or producing one-off items, Furnitubes has no equal.

Design and Development

Furnitubes International pride themselves on excellence through design. The design department uses state-of-the-art three-dimensional C.A.D software, plus a full range of graphic tools to ensure that concept ideas can be efficiently realised, analysed and to generate detailed working drawings for each product prior to manufacture. Products are constantly updated and improved in order to meet customers' expectations and to adapt to suit the changing environment.

▲ HEAD OFFICE in Greenwich, London

▲ WAREHOUSE in Gillingham, Kent

Quality Manufacture

In addition to casting in iron, bronze and aluminium, Furnitubes is able to manufacture items in many other materials, such as steel, timber, concrete, plastic and G.R.P. Skilled fabricators are able to cut, drill and weld components to strict tolerances, ensuring efficient assembly and a high quality finished product.

Medway Distribution Centre

Furnitubes' Medway Distribution Centre, located on the M2 near Gillingham, allows for easy access to London, the North and south, and to Europe. This modern facility integrates assembly, finishing, spray booth painting, quality inspection, warehouse storage and despatch.

The efficient M.R.P stock management system keeps track of orders and ensures accurate transmission of information at every stage. This confirms to staff at head office how much stock we hold at any given time.

Furnitubes typically hold over 5000 items in stock.

SPECIAL COMMISSIONS

- *the process*

Street furniture is increasingly being selected to reflect the character of an area and its local architecture. This effect cannot always be achieved using standard products, even when selecting from a range as comprehensive as ours!

Furnitubes International is currently one of the leading and most imaginative suppliers of bespoke street furniture in the world, using their sixty plus years experience in the manufacture of street furniture to provide an unrivalled design and manufacturing service.

▲ DORIC Fingerpost with FFT 4 Tablet Finial with infilled centre and crest (special commission) installed in Liskeard, Cornwall

Special commissions comprise a rapidly rising percentage of Furnitubes International's turnover as growing numbers of our clients seek to introduce a unique quality to their specific projects. Demand for originality and flair, an understanding of technical and aesthetic detail and the successful fusion of creativity and practicality are increasingly seen as essential to the provision of a total client service.

At Furnitubes International, all special commission work is undertaken by our dedicated design team. Based within our head office, each of our team members has their own unique skills and area of expertise, marrying the ability to understand our clients' needs whilst adding a unique dimension to any project. In the pursuit of excellence, our design team can be seconded to any Furnitubes' contract, from a complete commission and design service to overseeing the manufacture of products from specifiers' instructions.

In addition to our ongoing portfolio of work, Furnitubes design team are also involved in a constant programme of research and development, introducing new ranges to our catalogues of standard products and developing unique items for individual specification.

▲ YORKSHIRE ROSE CYCLE STAND (special commission) supplied to Hebden Bridge, Yorkshire

“ Amco (Gibraltar) are pleased to have been associated with Furnitubes International over the last ten years on public works in Gibraltar. ”

C.J Dickie, Managing Director
Amco (Gibraltar) Limited

FURNITUBES

WWW.FURNITUBES.COM

over SIXTY YEARS OF EXCELLENCE *est. 1946*

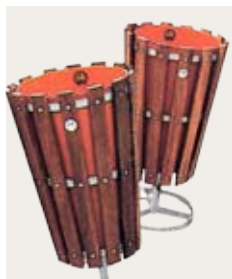

1940's

FURNITUBES IS BORN

Furnitubes was established by Jack Cluer in 1946.

After the war materials were scarce, but the marine engineer was able to source steel tubes from shipyards, where motor torpedo boats were being taken apart.

His first products were made from these recycled tubes for the new institutions that were being set up at the time, such as the National Health Service and Education establishments. He soon became a major supplier to the London County Council.

1950's

1951 FESTIVAL OF BRITAIN

At the festival Jack Cluer exhibited the original 'Tulip' timber slatted litter basket. Furnitubes breakthrough into the street furniture market.

IN 1954 FURNITUBES

was awarded the contract to supply the British Industries Fair in London at the South Bank, and the subsequent years saw an almost entire dedication to fulfilling orders for the popular product nationwide.

TULIP SUCCESS

At its height, Furnitubes gained International recognition when the 'Tulip' slatted litter basket was chosen for EXPO58 and the site of the Worldfair at Brussels in 1958.

Towards the end of the 1950's, Furnitubes began to offer a larger range of litter bins and wire baskets, in addition to some simple seating, that all proved popular with Local Authorities specifying for schools and public developments.

1960's

BRANCHING OUT

Furnitubes branched out and explored a multitude of exciting new products.

These included:

- Modular concrete seating and planters in all manner of shapes and sizes
- Playground equipment and skateboard ramps
- Modular utilitarian railing, advertising poster units and lighting systems
- Street sweeper carts and traffic cones
- Fun, bold PVC plastic products that could be found in swinging London locations!

VANDAL PROOF

The teenage boom led to an increase in vandalism, however Furnitubes rose to the challenge with products to deter vandals.

The new concrete litter bins, steel tree protection and tubular furniture ranges became the strongest contenders within the market.

1970's

STREET FURNITURE

With customers demanding a wider variety of products, Furnitubes released a 'range of street furniture' products to meet demand. New ranges of bollards, cycle stands, tree protection and new materials were introduced, including the launch of a great new concept - G.R.C "Vandal resistant, fire resistant and frost resistant" furniture.

NEW MATERIALS

Bollards and cycle parking were becoming widespread as more off-street parking facilities were made available. New materials, such as G.R.P (Glass Reinforced Plastic) were also being used for Planters and Grit Bins that had traditionally been made in concrete.

FURNITUBES

WWW.FURNITUBES.COM

Built on a sensible alliance of traditional process and contemporary thought, the business has learned to survive by accommodating market fluctuations for over six decades. The company has worked ceaselessly to satisfy client's needs and each challenge has enabled us to strengthen and build in both national and international markets.

1980's

40TH BIRTHDAY

Fumitubes celebrate 40 years and fully expand to offer a complete range of cast iron bollards, tree grilles, litter bins and bollards, which proved popular due to their durability and ability to stand the test of time.

In a drive to attract wealthier customers, the more refined designs of the Victorian era became ever more popular, seen in products such as the Eastgate and Rotherham seat.

SECURITY BOLLARDS

Following a pandemic of raids, Dixons approached Fumitubes to solve the problem. The result was the dedicated anti ram-raid Gunner Security which quickly became the standard security bollard amongst retailers for protecting store fascias from attack.

“In all our years dealing with Fumitubes International we have found their service and range of products to be of the highest quality. We always receive expert technical assistance and prompt responses to all our enquiries.”

John Corcoran, FM Conway Ltd

1990's

THE BELL BOLLARD

1985 brought the introduction of the Bell bollard, possibly the most famous of all Fumitubes products after the Tulip Litter Bin.

SEAGER BUILDINGS

The four-storey gin distillery at Seager Buildings was converted from a derelict shell into a bright modern head office and the unit opposite was equipped for storage, fabrication and fitted with a paint spray booth for faster painting and superior finish.

EXPANSION

Fumitubes continues to expand, releasing exciting new collections, including the Swedish 'Nola' collection.

NEW FOUNDRY

Fumitubes strengthened their control over source costs with the acquisition of a foundry in Sittingbourne, Kent.

INNOVATIVE PRODUCTS

Fumitubes position themselves as a major innovator within the industry, through expansion of the design department and investment in C.A.D, graphics and D.T.P publishing software. This led to a number of bespoke contracts, including: Historic gate restoration for L.B Tower Hamlets at Spitalfields Market, a Cafe Arch for L.B Greenwich in Greenwich Park and impressive new lighting for Wembley Arena.

CORPORATE RE-LAUNCH

A major new catalogue and new corporate logo was launched in 1995. Its professional layout was created in-house specifically aimed at architects and specifiers. Over 3,000 products were included and at the time it was generally accepted as the best on the market.

QUALITY ASSURANCE

In 1995 a second investment was made to quality and the company quality assurance programme was inspected and Fumitubes gained accreditation to BS 5750, formally known as EN ISO 9002:1994 by Lloyds Register Quality Assurance.

50TH BIRTHDAY

Fumitubes celebrate their 50th birthday. Contracts include the pedestrianisation of Main Street, Gibraltar, sculpted bollards designed by John Maine for Lewisham and a hundred metre covered walkway for Centro at Cradley Heath station, near Birmingham.

SPECIAL COMMISSIONS

The smaller Linx 200 system is conceived and kicks off with a substantial order for Wood Green, London. Fumitubes designers work with both Tunbridge Wells and Maidstone to develop completely unique street furniture ranges for their town centres.

NEW CATALOGUE

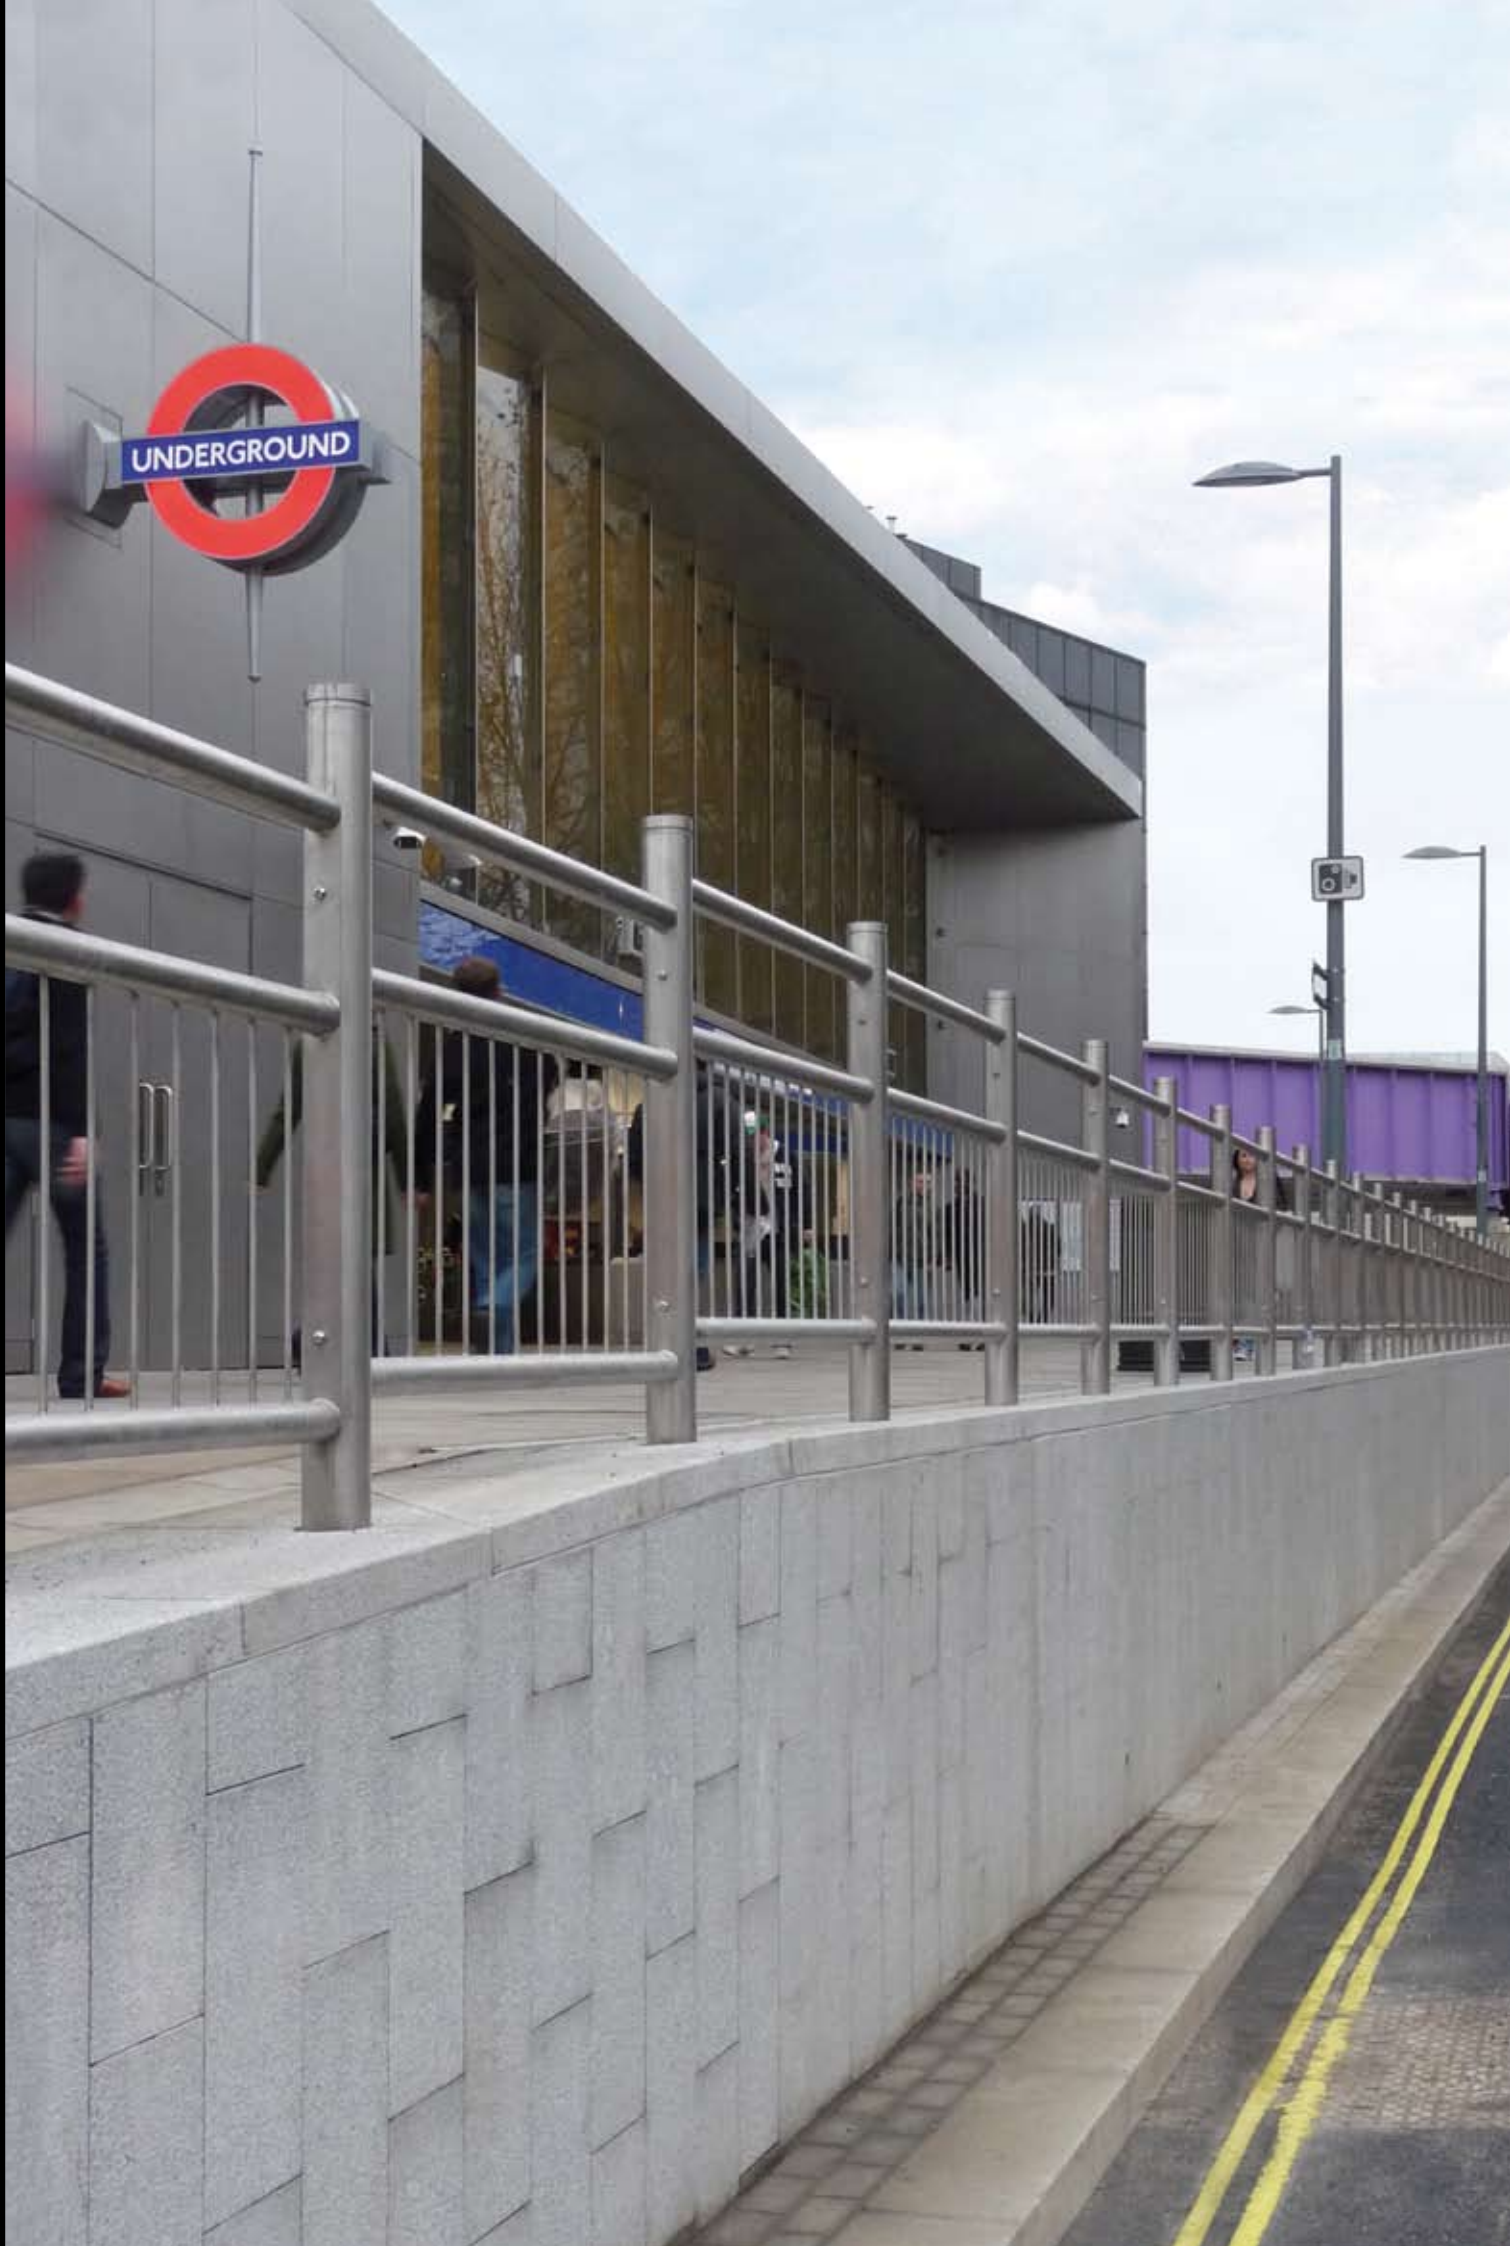

Fumitubes launch a new catalogue style and are awarded the contract for fingerpost signage for The Thames Path, Green Chain Walk, London Loop, Cray Riverway and all cycle routes.

STAINLESS STEEL

Stainless steel rises in popularity and Fumitubes launch many exciting new designs. Fumitubes' largest ever 12 metre market archway is unveiled at Hoxton Street Market in Hackney, London.

▼ LINX 400 ¾ GUARDRAIL satin polished stainless steel, installed at Wood Lane Underground Station, London

2000's

THE NEW MILLENNIUM

Commences with orders for Romney Railings at the St. George development at Vauxhall and prestigious signage for Winchester Cathedral and Portsmouth seafront.

The success of Linx railings continues with a special stainless steel cap variation for Walthamstow Town Centre. Memorial plaques are cast for the Rock of Gibraltar, balustrade is supplied to Brighton Marina and an increasing number of stainless steel products are sold.

ROYAL HILL

Furnitubes return to the street where they used to be based, with new offices on Royal Hill.

Many substantial orders including Linx100 and decorative hooped railings for Red Routes in London. Contracts this year include lamp post protector bollards for B,D,P, Walthamstow and Canterbury Bollards & FI Sockets for the Royal Albert Hall, London.

SALES, SERVICE & STOCK CONTROL

Furnitubes new Medway Distribution centre provides substantial, efficient warehouse facilities. Further expansion and investment in 3D C.A.D software.

A successful exhibition at External Works 2005 where the Zenith seat and bench and the BELL 115 and Harbour bollards are officially launched.

FURNITUBES 60TH ANNIVERSARY

Many new products, including ash waste bins and an extended Portman range are introduced to coincide with the brand new 270 page Diamond Edition catalogue. Furnitubes exhibit these new products at Saltex 2006.

HEREFORD TOWN CENTRE

Furnitubes supplied Hereford Town Centre its comprehensive Zenith range. Painted black to match the council's corporate colours, the Zenith steel and timber seat, bin and bollard were supplied to the area. Black painted College cycle stands and stainless steel Zenith litter bins were also supplied.

FURNITUBES GO GREEN!

Furnitubes launch new recycled composite timber, made from 50% sawdust and 50% plastic. The environmentally friendly material has a look and texture akin to timber with the added benefits of recycled plastic.

LINX 400

The stylish Linx 400 railing system is a new addition to the revolutionary Linx range. The sleek and flexible railing system is available in 100% stainless steel. The rails are attached to unique curved plates which fit flush onto the posts in any position or angle. Installed in Hammersmith, London, the range transformed the area.

The Linx 400 accompanied the Linx composite range at Heathrow's Terminal 5, used for their bus station, car park and trolley bays.

WESTFIELD SHOPPING CENTRE, LONDON

Furnitubes supplied several stainless steel products to Europe's largest inner city shopping centre. The Linx 400 railings, Zenith cycle stands and District traffic bollards were supplied to the site in West London.

“Colomendy Limited are pleased to be associated with a company as professional as Furnitubes International. Our overseas reputation can only be enhanced when our partners perform to their best. We find Furnitubes fulfil these requirements admirably.”

FURNITUBES

ENVIRONMENTAL POLICY

“ As part of our system scope covering the design, sales and procurement of street and landscape furniture together with associated security products, we are committed to continual improvement in our environmental performance, paying special attention to the following issues:

- Effective management of our emissions to air, water and land, seeking their elimination, re-use or reduction where practicable.
- We will also seek, again where practicable, to segregate and/or re-use all materials suitable for recycling.
- Compliance with relevant legislation and other requirements covering any of our operations.
- Ensure our processes and operations prevent pollution.
- Efficient use of energy.
- Minimisation of our consumption of natural resources.
- Effective management and minimisation of our waste streams.

We are committed to working in accordance with and maintaining the environmental management systems standard ISO 14001: 2004.

We are committed to setting environmental objectives and targets and monitoring and reviewing of our environmental performance against these objectives and targets.

We will encourage understanding of our environmental policy and objectives by our suppliers, customers and contractors.

We will make our staff aware of the environmental implications of their work as it affects us, our customers and our neighbours. We are committed to giving our employees and contractors all necessary instruction to enable them to comply with our environmental policy.

We are committed to providing the resources to enable us to implement our environmental policy.

In accordance with our defined scope, this policy provides a framework for the development and progressing of our environmental objectives. ”

HEALTH & SAFETY POLICY

“ The directors accept overall responsibility for co-ordination and delivery of Health and Safety Policy towards all staff. As part of our system scope covering the design, sales and procurement of street and landscape furniture together with associated security products, our policy is to provide and maintain safe and healthy working conditions, equipment and systems of work for all employees, and to provide such information, training, supervision and support as they need for this purpose. We also accept our responsibility for the health and safety of other people who may be affected by our activities.

The day to day allocation of duties for safety matters and the particular arrangements that we will make to implement the policy are set out on various notice boards within the company.

As part of our use of ISO 18001:2007 we are committed to:

- The prevention of injury and illness
- Compliance with legislation, regulation and other requirements
- The continual improvement of our health and safety management system
- The continual improvement of our health and safety performance

All employees will be issued with a Health & Safety Policy within their Company Handbook. New employees will be given basic Health & Safety training during their Induction Programme.

Induction Programmes will also include instruction on Fire Procedures, introduction to First Aiders and indicate the emphasis of the employee's responsibility to conduct themselves in a safe and responsible manner with regard to their own Health & Safety and other members of the work force.

Job training regarding the various aspects of Health & Safety with regard to the equipment and materials used, will be delivered by the relevant supervisor or suitably trained personnel.

We are committed to providing the resources to enable us to implement our Health and Safety policy.

In accordance with our defined scope, this policy provides a framework for the development and progressing of our Health and Safety objectives. ”

established 1946

“Over Sixty Years of Excellence”

QUALITY POLICY

“ The Company is design led with the design team able to respond to most specifiers' needs, producing working drawings to enable the production to be carried out to its maximum efficiency and economy, and encompassing the latest methods of aftercare maintenance...

The Headquarter Office in Greenwich, London have been sympathetically designed to provide excellent working conditions and this generates a good team spirit. The offices include a training room which enables staff to keep abreast of the latest advancements within the marketplace and aware of company developments...

We are committed to the *Investors in People* programme to assist in recruiting and training all staff to carry out their jobs as competently as possible...

Company Policy is to provide a service that is second to none and to this end we have developed and recorded a quality system which covers every aspect of Company operations and which we shall maintain to *International Quality Standard BS EN ISO 9001* and beyond...

We continually evaluate the effectiveness of our Quality System by means of Audits and Management Review Meetings. ”
