

special COMMISSIONS

▲ **YORKSHIRE ROSE CYCLE STAND**
(special commission)
supplied to Hebden Bridge, Yorkshire

Many of Furnitubes cycle stands can be adapted for specific locations, ranging from coloured coatings to featuring logos and corporate information.

The Yorkshire Rose cycle stand shown left, is an example of this. The mild steel stand has been plastic coated black with laser cut wording and has been fitted with a vitreous enamel plate.

The Fin cycle stand has a unique corner plate that can accommodate an extremely hard-wearing vitreous enamel plaque. Securely fitted to a plate in the neck of the stand, the sign clearly identifies the providers and sponsors of the stands without interfering with the basic function of the product.

▲ **SPONSORSHIP PLATE**
feature available on FIN
cycle stand (see page 91)

▲ **BRIGHTON BOLLARDS**
as a cycle stand, supplied to
North Street, Brighton

Several of Furnitubes bollards can be adapted to accept a tube, transforming them into cycle stands. The Brighton bollard shown here has been adapted as a cycle stand, allowing it to blend perfectly with existing bollards also from the Furnitubes range.

▲ **COLLEGE**
extended size with taper bar

The **College Cycle Prevention Barrier** demonstrates Furnitubes' ability to address economic small batch production. Manufacturing in steel avoids the set-up costs associated with newly designed cast iron or concrete products.
