

▼ PEDIGREE Dog Waste Bin available in green and red (inset) as supplied to LB Bromley

# DOG WASTE

## bins

Dog waste is one of the main complaints of those who use both public footpaths and recreational areas such as parks and children's playgrounds. Dog waste is not only an ugly menace but a serious health hazard and it is sensible to promote, wherever possible, the use of dog bins.

▲ BOXER

The **Boxer** and **Pedigree** are robust, appealing and practical cast iron dog waste bins designed to complement heritage areas. These bins have a generous capacity. The Pedigree bin also has a hook onto which the dog's lead may be hung while the bin is being opened and closed.

The **Terrier** polyethylene dog bin has been manufactured for ease of use by the public and cleansing authority. The dual position lid remains upright for cleaning purposes but is self-closing during normal use. A deodorising block is secured within the lid to neutralise smells.

### TECHNICAL

#### Note 1

#### Boxer Finish

The Boxer is available in most BS 4800 & RAL series gloss colours. The DOG WASTE ONLY words, raised borders and the logo may be highlighted if required.

#### Note 2

#### Dog Waste Sacks

Standard household size refuse sacks can be used with the Pedigree. Sacks are not supplied.

#### Note 3

#### Pedigree Finish

The Pedigree is available in most BS 4800 & RAL series gloss colours. The arrow symbols, DOG WASTE ONLY words, the lid & raised borders around the logo & the panels on the door may be highlighted if required.

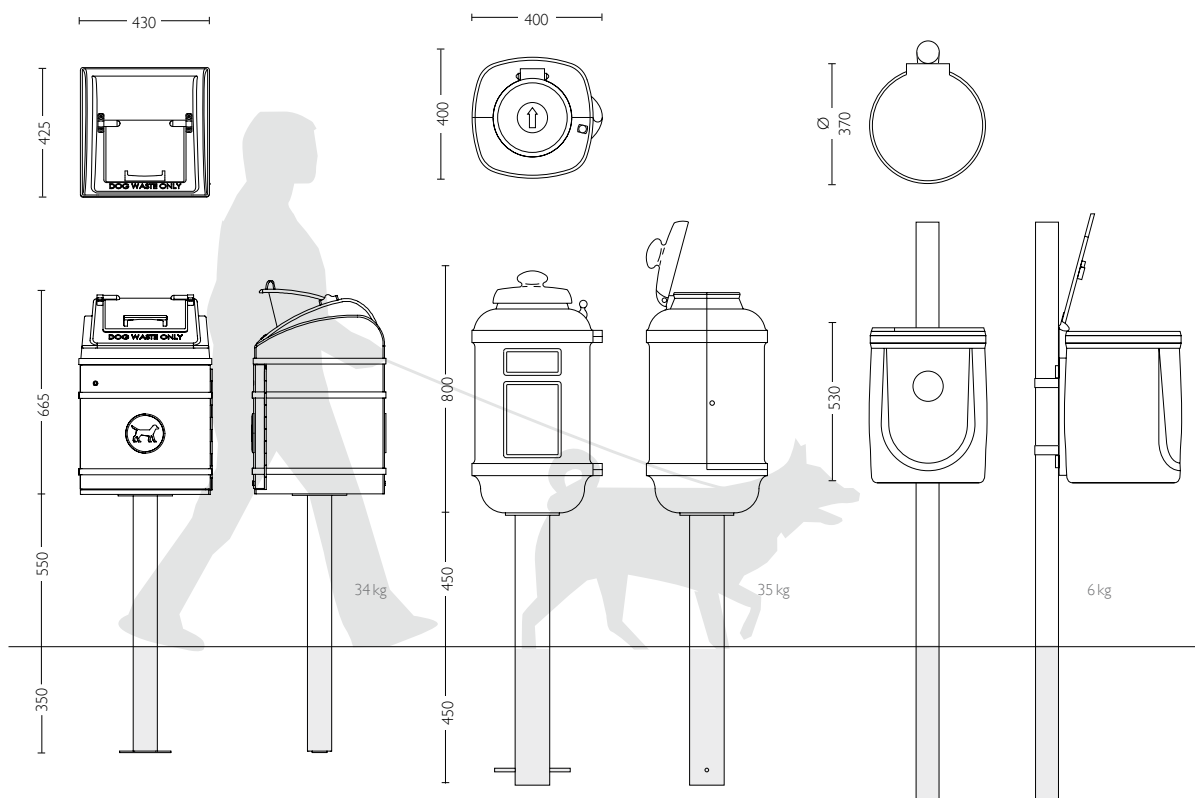

#### Note 4

#### Terrier with Post

Bins & posts are supplied separately for banding together on installation. Straps are not supplied. Jubilee-style clips are supplied as an alternative. The standard post is 2000mm high and in a grey plastic coated finish.

#### Terrier without Post

These bins may be either banded onto existing posts or wall mounted via a universal fixing bracket incorporated into the bin. Banding is not supplied.

# LUCKY

## *dog waste bin*

▲ LUCKY Root Mounted  
stocked in Red and Green as standard  
as supplied to Berkeley Homes, Marlow, Buckingham

Based on customer research, Furnitubes are proud to now offer the Lucky all-steel dog waste bin. The galvanised construction minimises fire damage and is extremely durable.

The handle and hinge are stainless steel and the hygienic easy-lift double lid with integral metal chute conceals the bins' contents whilst opening. The galvanised liner is removable to allow regular cleaning and the quick-release slam-lock makes emptying more convenient.

▲ LUCKY Root Mounted (and Snuffles)

▲ LUCKY Post Mounted  
shown in Ramsgate, Kent

▲ LUCKY Post Mounted  
optional brackets to suit  
post mounting with banding

The bin is available in three versions:

- root mounted (supplied with a post)
- wall mounted (with pre-drilled holes)
- post mounted (mount to existing posts)

## LUCKY ALL-STEEL DOG WASTE BIN

### DOUBLE-LID WITH INTEGRAL CHUTE

The user-friendly easy-lift flap is designed specifically for dog waste disposal. The hygienic double-lid ensures that users have no access to bin contents and reduces the possibility of water entering

### STYLISH & SAFE

Tapered design offers a unique style and soft, curved edges are ideal for pedestrian areas

### GALVANISED STEEL LINER

Steel is strong and fire-proof and the galvanised coating provides a long-life and rust resistance. The liner is fully removable which allows easier cleaning and sanitation

### SELF-CLOSING SLAM LOCK

The lock is discretely located on the side of the bin and is opened using a hexagon socket key. Key is not required when closing, the door can be easily shut thanks to the slam-lock

### ALL-STEEL VANDAL RESISTANCE

Heavy Gauge 2mm thick Zintec construction. Unlike plastic bins, steel is tough against vandals and does not burn. The zinc and powder coated finish offers long-term protection from the elements

### STAINLESS STEEL HANDLE

Stainless steel is hygienic and offers ultimate corrosion and fire resistance. Also, being more chemically resistant than plastic makes it easier to maintain.

### THREE FIXING OPTIONS

The dog bin can be supplied with its own post which features a dog hook. Alternatively, it can be wall mounted or supplied with brackets to suit existing posts (banding not supplied)

### INFORMATION LOGO

DOG WASTE ONLY information logo conforms to current guidelines

### HYGIENIC

Design is optimised for cleaning and maintenance

### FRONT OPENING DOOR

The front opening door allows the liner to easily slide out without having to lift the often heavy contents

#### LUCKY ROOT MOUNTED

##### LUK 745 F

Root Mounted Steel Galvanised Dog Waste Bin  
Supplied with Post

Wall Mounted dog Hook

### TECHNICAL

#### Finishes

The Lucky is available powder coated either RAL3002 Red or RAL6005 Dark Green as standard. Most BS/RAL colours are available upon special request.

The Lucky can also be Enhanced Powder Coated (EPPC), which involves a specialist pre-treatment process. A large range of BS/RAL colours are available.

For further information on paint finishes refer to pages 337-339.

#### Post Mounting

Post and banding not supplied with the Lucky Post Mounted.

Product Codes are in **bold type**. Dimensions are in mm, are approximate and do not form any part of the contract.

We reserve the right to change the design and specification on any item offered and, where possible, notification will be made.

# DOG WASTE

## *bins*

### TYPICAL INSTALLATION

Typical installation of Lucky dog waste bin shown in this example, although instructions may apply to all dog waste bins.

Begin by preparing a foundation hole with a minimum size of 350 x 350 x 500mm deep.

Securely attach the dog waste bin to post.

Backfill the excavated foundation with concrete or other suitable material.

Ensure the dog waste bin and post are vertical and require no further adjustment.

Finish surface to suit local site conditions.

The installation is now complete.
