

**Timber Care & Preservation**  
Furnitubes offer all our customers the following advice when installing our range of exterior-use timber seating. Normal weather conditions can cause shrinkage and cracking in all timber products, due to their natural reaction to the elements. Most Furnitubes' timber products are supplied untreated, enabling application of the most appropriate preservative for the particular installation site. Please see appendices or contact your local Wood Preservation Specialist for further details and recommendations.

# EASTGATE

## range

The Eastgate's intricate and regal styling complements Victorian and Edwardian architecture, making it ideal for areas where conservation and heritage are important.

The Eastgate seat is also available with a central arm that is often beneficial to the elderly user or to those with disabilities.

▲ EASTGATE SEAT  
with painted standards  
installed in Guild Street Bus Station, Aberdeen

▲ EASTGATE SEAT  
with painted standards, central arm-rest & date motif  
installed at Chelmsford Bowls Club, Essex

The Eastgate may be supplied with the year of production (as pictured left) or with simple crests and logos cast into the end standards.

Also, seats for presentation, commemoration or memorial use are available with an engraved bronze plaque attached to the backrests of the seats.

▲ OCTAGONAL EASTGATE SEAT  
(special commission)

### RECYCLED COMPOSITE SLATS

The Eastgate seat is also available with recycled composite slats, made from 100% recycled material, consisting of 50% sawdust & 50% HDPE. See page 165 for more details.

Furnitubes cast iron is 100% recyclable

Furnitubes timber is 100% biodegradable

Legally sourced certified timbers available on request

Seat height & arm rests can be an aid when alighting

Furnitubes recycled slats are made from 100% recycled material

Seat height & arm rests can be an aid when alighting

▼ NEW FOREST Seat supplied to Sacred Heart Primary School, Ruislip, West London

# NEW FOREST *range*

The contemporary form of the New Forest range was engineered to take into account developments in casting technology, economic use of materials and to provide optimum ergonomics.

The ends of the timbers are secured within and protected by the inner profile of the cast end standards. Also, the fixings are not visible from the front which minimises damage to clothing and the risk of vandalism.

The range is available in several lengths and the addition of a central arm assists both abled and disabled people to get in and out of the seat more easily.

▲ NEW FOREST Bench  
supplied to Staines High St, Middlesex

▲ NEW FOREST Seat  
installed at Halliwell Court, Barry Road, Southwark, London

# JUBILEE *range*

▲ **JUBILEE STEEL SEAT**  
plastic coated  
as supplied to Turton High School, Bolton

▲ **JUBILEE STEEL & TIMBER SEAT**  
installed at the Broadway, Kidlington, Oxfordshire

The modern Jubilee range is manufactured from steel to withstand today's harsh environments.

The plastic coated, heavy-duty box frame construction is the ideal choice for schools, hospitals, transport interchanges or remote locations where vandalism could be an issue.

The Jubilee bench and seat are supplied plastic coated as standard, but are available in a variety of other finishes. See technical for more information.

The Jubilee seat and bench are also available with recycled composite slats, made from 100% recycled material, consisting of 50% sawdust and 50% HDPE. See page 165 for more details.

# JUBILEE range

## MORE OPTIONS

Building on the strength of the Jubilee steel range, timber slatted versions of the seat and bench are now available. Heavy duty legs offer a high degree of resistance to knocks and scratches while the slats provide the natural elegance of hardwood.

▲ JUBILEE STEEL & TIMBER BIN  
(see litter & waste section)

A Jubilee litter bin is also available to complement these designs (see Litter & waste) and the Jubilee could also be produced in stainless steel on special request.
