shaping outdoor spaces

Ribbon.

Stylish, simplistic design

Ribbon seating offers a simple and minimalist design that enhances any outdoor space.

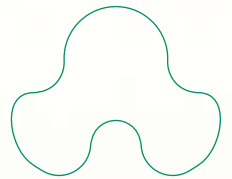

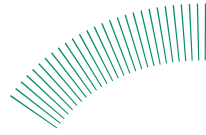

Along with standard seats and benches, a variety of unique designs have been created, including the dual-function Ribbon multiseat/ table – a great addition to schools, universities, play areas, and hospitality settings. And the Ribbon XL Recliner – offering a relaxed seating solution in parks and private gardens.

All Ribbon and Ribbon XL units are manufactured using recycled steel and seating platforms with legally sourced certified iroko timber slats which are available in four lengths, to form from one person units up to four person.

A matching Ribbon cycle stand is also offered in the range to create a coordinated suite across a scheme.

Why choose Ribbon?

- Budget-friendly contemporary solution
- Easy to install Freestanding or bolt-down modules
- Available in many shapes and sizes to suit any requirement
- Coordinated cycle stand for an integrated visual look

Seating, in two profiles.

Ribbon Standard

- Slick, stylish, affordable design
- Removable slats for easy repair and maintenance
- Visually light but very robust
- Seats can be left freestanding or bolt down
- Armrests integrated as part of the bench or the seat support
- Choice of benches, seats and multiseat / table option

Ribbon XL

- Solid, heavy construction – ideal for busy public areas
- Increased seating platform depth allows perch seating from both sides on benches
- Can be bolted down or freestanding
- Timber fascia boards with rounded top edge for added comfort
- Choice of benches, seats, and recliner option

Ribbon Standard.

With the Ribbon standard range, you'll find a sleek design that's simple and stylish. Designed to accommodate one person, as a single seating solution or up to four people.

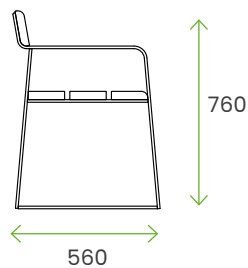

Particularly suitable for housing developments and education establishments due to its practical and affordable design.

Ribbon Standard seat.

Seats with backs are particularly suited to placement where longer stay seating is required as the backrest support offers greater comfort. Ribbon seats are simply styled, with the seat support integrating both the backrest and armrest.

Armrests are useful for less able-bodied people as they provide an aid to lowering down onto and getting back up from the seat.

Options

- Timbers with UV protective finish
- Seat supports powder coated to any RAL colour
- Seat supports in stainless steel
- Single seat, 2, 3 or 4 person unit

RIB8AM-TP
4 person seat

As is characteristic of the entire Ribbon seating range, the recycled steelwork frame is visually light but structurally very strong and has removable timber slats for easy repair and maintenance.

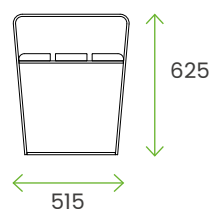

RIB2A-TP
Single person seat

Ribbon Standard bench.

Users can sit on the bench from both sides, either facing the same or different directions.

Benches in any environment make excellent 'short stay' seating.

Choose your Ribbon bench with or without armrests.

Options

- Timbers with UV protective finish
- Bench supports powder coated to any RAL colour
- Bench supports in stainless steel
- Single bench, 2, 3 or 4 person unit

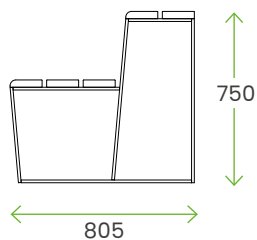

RIBB8AM-TP
4 person bench

Ribbon Standard multiseat.

The unique Ribbon multiseat is dual functional, doubling up as a two tier seating unit or a bench and table. This makes it ideal for education, hospitality environments or rooftops gardens.

It is possible to assemble two units back to back to create a seamless picnic table.

Options

- Timbers with UV protective finish
- Seat supports powder coated to any RAL colour
- Seat supports in stainless steel
- 2 or 4 person unit

RIB8M3-TP
4 person multiseat

Ribbon XL.

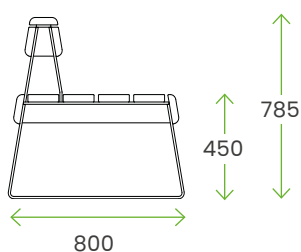

Ribbon XL offers more generous seating to that of the standard to accommodate how people use street furniture. Wider seating to allow back to back sitting, perching and generally allowing more space between users.

Ribbon XL seat.

The Ribbon Seat is also designed with a 720mm deep seating surface but comes with a backrest.

Armrests are offered as integral features to steel platform supports or as add-on features fixed to the timber seating platform.

Options

- Timbers with UV protective finish
- Seat supports powder coated to any RAL colour
- Seat supports in stainless steel
- Single seat, 2, 3 or 4 person unit

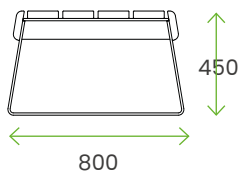

RIX8-TP
XL 4 person seat

Ribbon XL bench.

The Ribbon bench is designed with a 720mm deep seating surface allowing it to be used as perch seating from both sides at the same time, doubling the seating capacity.

Armrests are offered as integral features to steel platform supports or as add-on features fixed to the timber seating platform.

Options

- Timbers with UV protective finish
- Bench supports powder coated to any RAL colour
- Bench supports in stainless steel
- Single bench, 2, 3 or 4 person unit

RIXB8AM-TP
XL 4 person bench

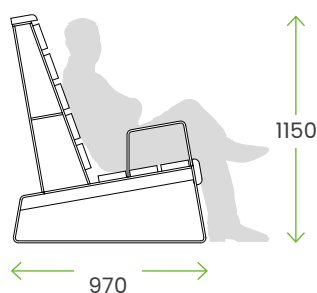

RIX8A

4 person seat with end arms

Ribbon XL recliner.

The Ribbon XL recliner is a unique addition to the collection, designed to enhance the enjoyment of leisure environments such as parks and gardens. Its sloped seating surface and high back allow users to relax and enjoy the surroundings.

The recliner is available as a two-seater unit, with the central armrest as standard, inclusively designed to assist users in getting off the seat.

Options

- Timbers with UV protective finish
- Seat supports powder coated to any RAL colour
- Seat supports in stainless steel

Ribbon cycle stand.

The Ribbon cycle stand provides a coordinated approach across a scheme where Ribbon seating is used.

Two standard size options are available - a short version to match the profile of the bench support and a larger model of more conventional cycle stand scale.

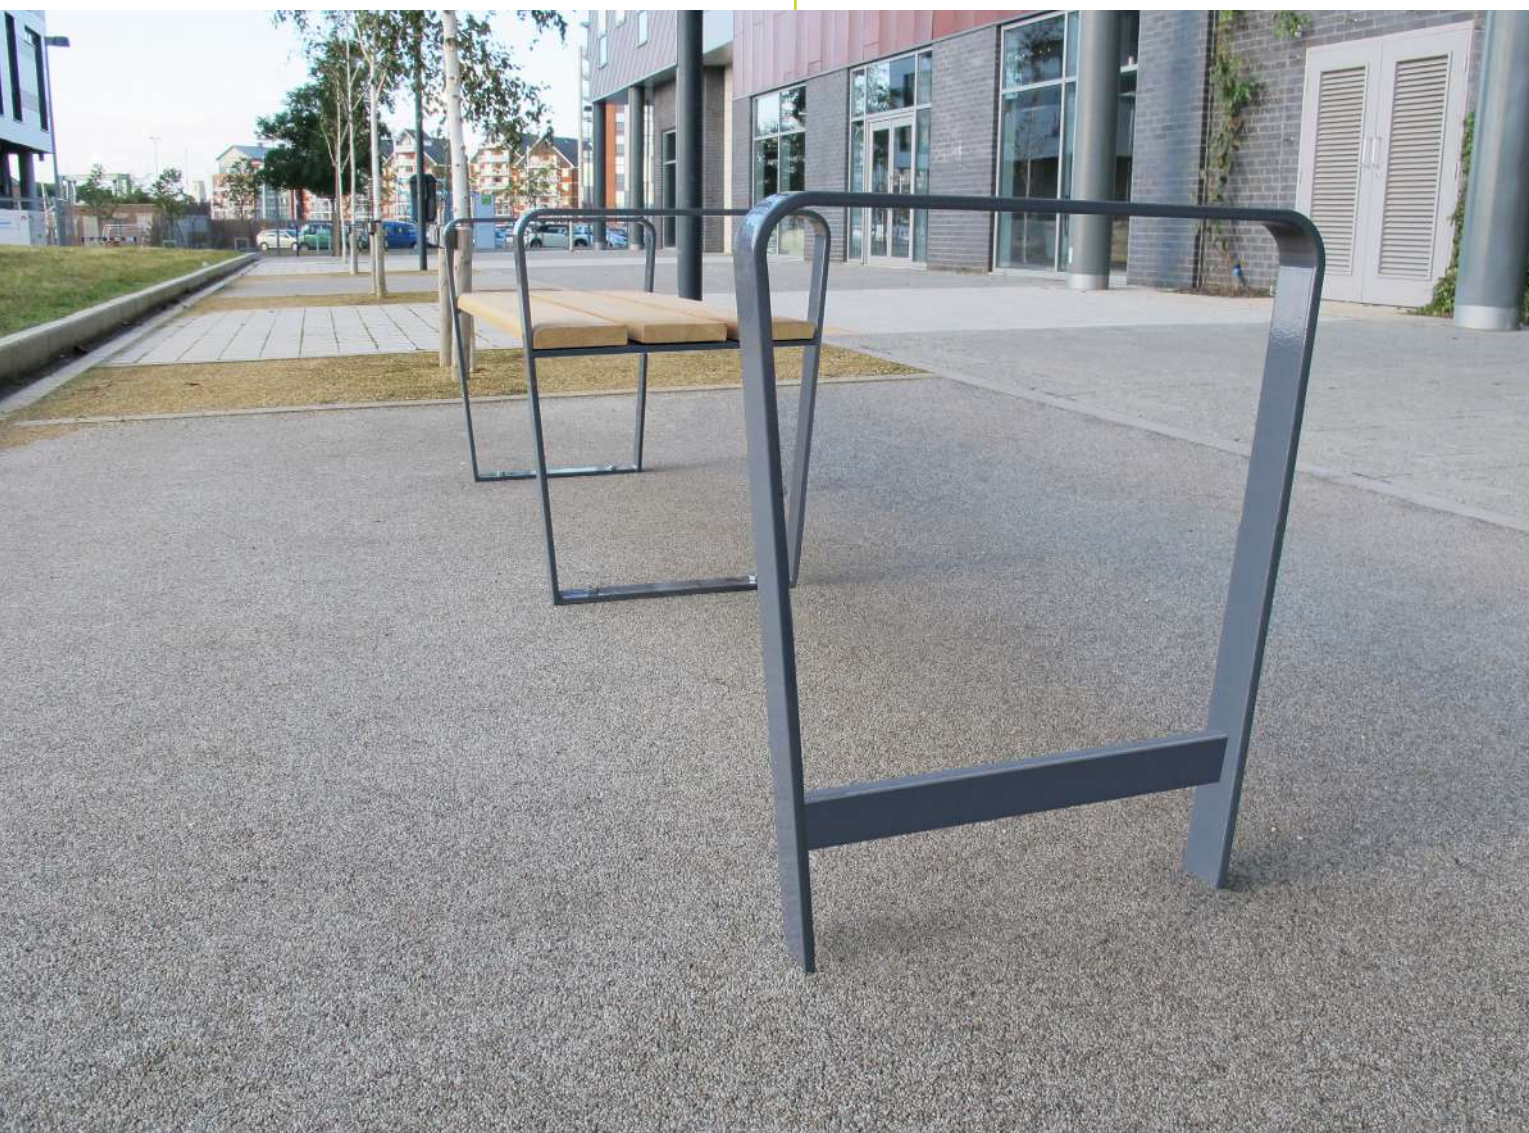

Produced from a 10mm thick solid flat bar and with a standard taper bar to assist the visually impaired.

Available as in-ground or bolt-down versions, it comes in 2 finishes:

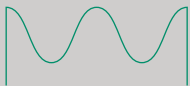

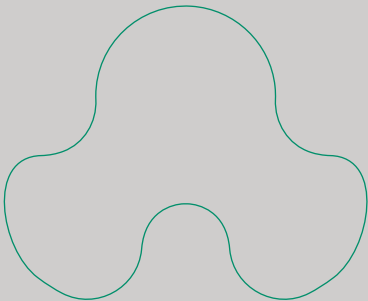

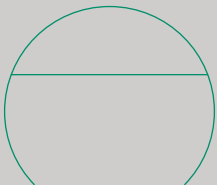

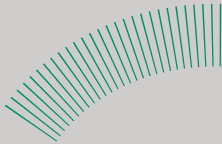

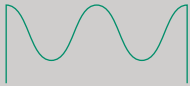

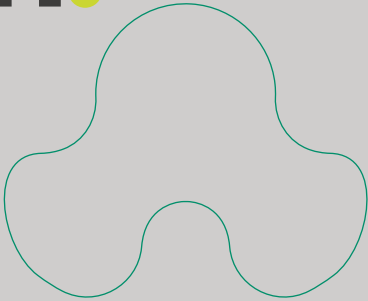

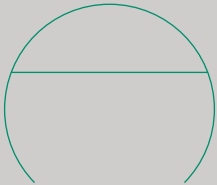

- stainless steel
- polyamide (black or grey)

Options

- Root Fix
- Base Plate

Technical information.

Ribbon seating.

Finishes & materials

Ribbon seating range structures, legs and supports are made of 10mm thick, 80% recycled mild steel triple process powder coated to a standard RAL or in a stainless steel satin finish Grade 304 or 316.

We have a carefully selected suggested RAL colour palette for all our products, details available on request. Seat and backrest are made of FSC certified Iroko wood slats.

Delivery

Fully Assembled

- Set up and go
- Minimises time required for site installation
- Labour costs reduced
- Ground fixings not supplied

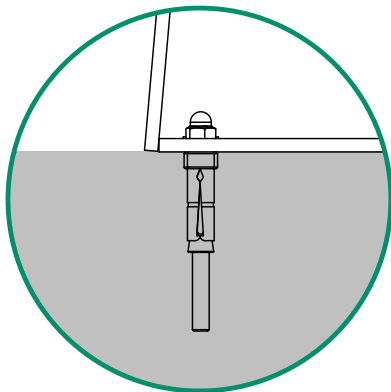

Ribbon seating technical info.

Installation

All Ribbon seating products are pre-fitted with nylon feet, which prevent the steelwork from marking the paving if the seats are free-standing, and also protects the steelwork from being abraded by paving, especially if the steelwork is coated.

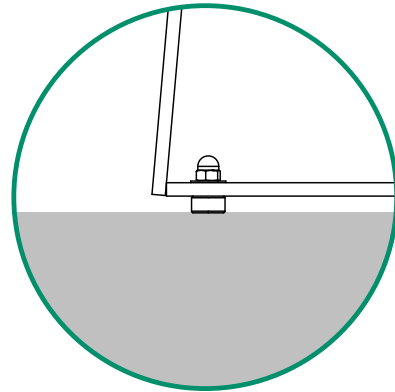

Bolt-down seating

- For permanent installation in public areas, we recommend that the Ribbon products are bolted down to the ground.
- When the feet are removed the pre-drilled holes can be used for an M10 ground anchor fixing (not supplied).

Freestanding seating

- The profile and weight distribution of the Ribbon range also allows them to be safely used as freestanding units using the feet provided.

Care & handling

Personnel and tools required

We would recommend a minimum of 2 suitably skilled workers.
Spanners / sockets for M8 and M10 socket head bolts and nuts are required.

General handling – health and safety

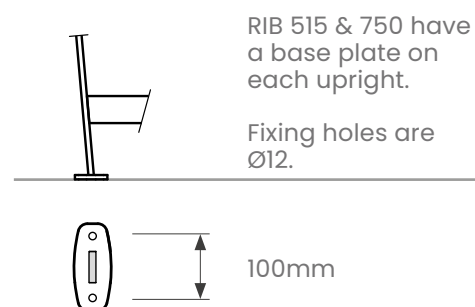

Care should be taken when manually handling these items, including good lifting and transportation practices.
Hand and foot protection must be used when moving and installing these products.

We recommend inspecting and tightening all nuts and bolts at regular intervals using M8 and M10 tools.

Why Furnitubes.

- **Made in the UK**

our factory is based in Kent, so expect faster leadtimes and no supply chain delays

- **Easy to maintain + low labour costs**

we make sure that fixing points are easily accessible so slats and brackets can be changed easily when damaged

- **Modular solutions**

our ranges are modular and customisable, seating and planters can be easily combined, be creative without blowing the budget

- **Our approach**

we take a considered approach to design, it's not just about the end product. We take everything in the process into consideration, we are collaborative and we are committed to producing products that improve our environment & keep people safe.

Our Process.

- **Get in touch** – it's as simple as that, give us a call or drop us an email, we're happy to help whatever the medium!

- **Collaborate** – Depending on your needs, you might not actually need us at this stage, that's the beauty of our modular ranges – they're designed with you in mind, so you can specify with ease. Nevertheless, we are here for you if you do – our design team are always on hand to discuss the nitty gritty of your project.

- **Specification** – This is where our team of experts take the wheel and help you with sketches, CADs and more to help you specify our products as easily as possible.

- **Production + delivery** – all of our products are designed and manufactured in the UK allowing us to give you shorter lead times. With a dedicated project manager keeping you in the loop, you can trust everything is in hand.
