

Cycle stands.

Cycle stands.

On your bike!

Cycling is the fastest growing mode of transport, as unlike cars, it is an environmentally friendly option for travel with zero-emissions. Ideal for reducing carbon footprint and improving air quality in local areas.

With its ever-growing popularity it is essential that local authorities, retail centres, workplaces, education establishments and leisure facilities provide increased, secure bicycle parking facilities.

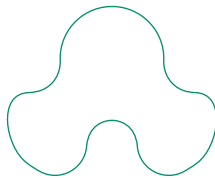

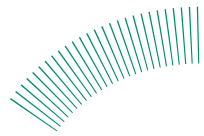

Furnitubes' cycle stands range consists of simple, industry standard solutions to unique bold designs. No matter what your scheme, there's an option to

suit any environment and the option to customise with tape, branding, materials and finishes. All Stands and racks can be supplied for in-ground installation or bolt-down installation.

Browse our cycle parking range to find the best suited option for your scheme or business. Need help choosing? We offer no obligation professional advice to assist with your product selection.

Why choose a Furnitubes cycle stand?

- **Made in the UK** – low carbon emissions
- **Sustainable** – recycled steel for most of our steelwork
- **Easy to maintain** – hardwearing & high-quality products
- **Cost effective** – a cycle stand solution to suit all budgets

A cycle stand to suit every site.

Choice of materials & finishes

Mild steel in a choice of:

- Galvanised finish
- Polyamide coating

Stainless steel in grades 304 & 316 in a choice of

- Bright polished finish
- Satin polished finish

• Polyurethane elastomer (PU) in:

- Matt painted finish

Choice of options

Options:

- Add pre-fixed cycle parking signs or stickers
- Add reflective bands for improved visibility

Installation options

Root Fixed

- Foundation depth is usually the same as the root depth of the cycle stand
- Minimum recommended foundation square is 200mm
- Concrete mix to 25 newtons

Bolt-down

- Base plate on each upright, each with 2 no. Ø12mm ground fixing holes

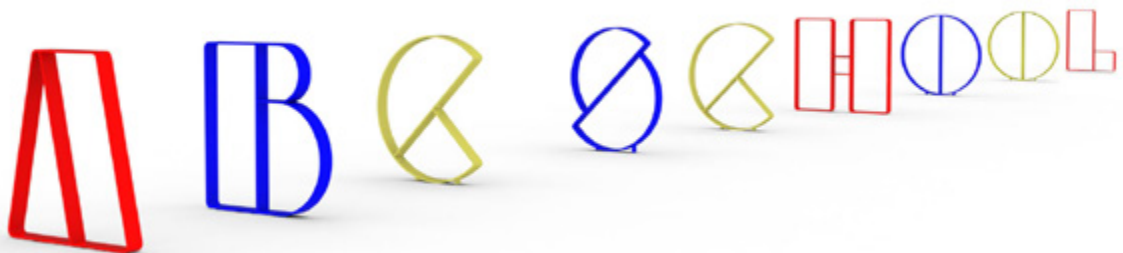

Letterform.

Creative, robust cycle parking

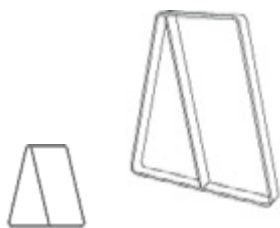

The Letterform range of stands brings something very different to cycle parking provision – letters can be arranged to spell out the cycle parking function, the name of the site or company, or even a message.

- **Unique** and **functional** design
- 26 distinctive alphabet characters including blanks
- Choice of **materials** and **finishes**
- Bolt-down or in-ground options
- Designed and made by us in the **UK**

As standard, each letter is manufactured in a heavy duty steel bar with a polyamide coating to provide a robust, secure and attractive product for many years.

Sheffield.

Simple & effective, the go to cycle stand

Sheffield has become the by-word for the cost-effective and proven range of hoopstyle cycle stands. Manufactured in robust circular section tube, the Sheffield range is offered in both mild steel and stainless steels (grades 304 & 316) and two widths, and all available as a rooted version for in-ground fixing or with a base plate for bolting down.

Further options include a taper rail designed to aid the visually impaired and reflective bands (available in a choice of colours for visual contrast with the stand metalwork) to improve the visibility of the products for night time motorists.

- Single stand or toast rack option
- Manufactured in our **Kent factory** from **recycled steel**
- Choice of **materials** and **finishes**
- **Bolt-down** or **in-ground** options
- Optional **tapper rail** and **reflective band**
- Stock item – **quick leads times**

Fin.

Distinctive, durable design

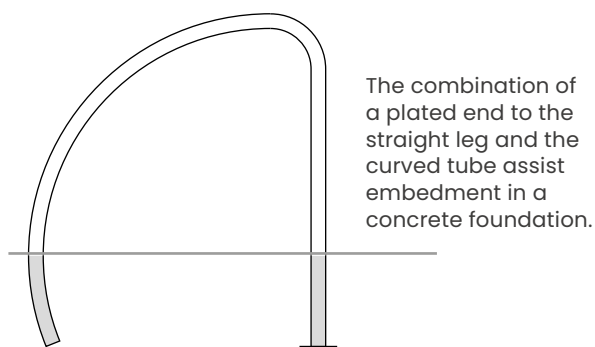

The Fin cycle stand is a Furnitubes' original design – inspired by the profile of a shark's fin breaking the surface of the ocean. The combination of this distinctive form and heavy duty steel sections make the Fin a much more prominent site feature than other simpler hoop designs.

Material options include galvanised or plastic coated mild steel, or stainless steel in grades 304 or 316, in a satin or bright polished finish.

- Choice of **materials** and **finishes**
- Option for a **decorative corner** plate with hole
- With or without **tapper rail**
- Choose from **two tube sizes** – Ø48mm or Ø60mm
- **Bolt-down** or **in-ground** options
- Designed and made by us in the **UK**

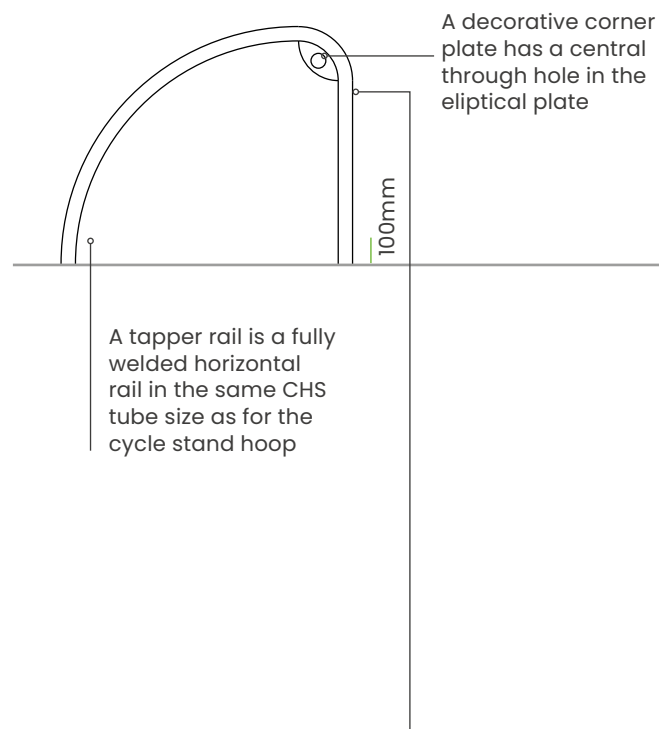

Root Fixed versions

The combination of a plated end to the straight leg and the curved tube assist embedment in a concrete foundation.

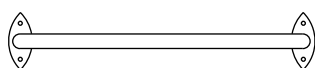

Corner plates, taper rail & reflective tape

A decorative corner plate has a central through hole in the elliptical plate

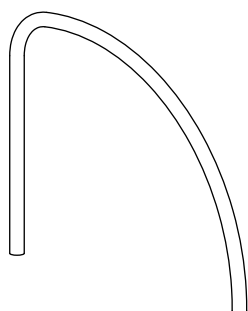

A taper rail is a fully welded horizontal rail in the same CHS tube size as for the cycle stand hoop

Bolt down versions

Each leg has a base plate with 2 no. Ø13 holes for ground fixing.

Ribbon.

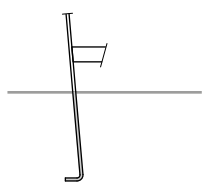

Elegant, harmonising cycle stands

The elegant delta-shape of Ribbon cycle stand is derived from end profiles of the seating from the same range. Two cycle stands are offered as part of the range – a short version to exactly match the profile of the standard Ribbon bench support, a larger model of more conventional cycle stand scale, all stands are manufactured from 10mm thick solid flat bar section, complete with a standard taper bar to assist the visually impaired.

- Part of a **coordinated suite of seating products**
- Choose steel **polyamide** finish or **stainless steel**
- Available in a **choice of two size options**
- **Bolt-down** or **in-ground** options
- Designed and made by us in the **UK**

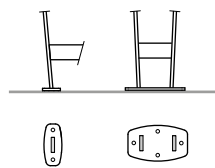

Root Fixed versions

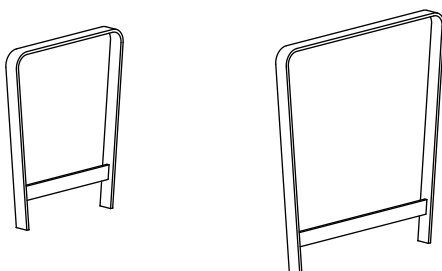

Uprights extend 300mm below ground, with a returned end to aid embedment in concrete.

Bolt down versions

RIB 515 & 750 have a base plate on each upright & RIB 195 has a single plate. Fixing holes are Ø12.

RIB750

Coordinate your scheme with Ribbon seating.

For a fully coordinated suite we have the slick and stylish Ribbon seating range. Based on a minimal number of seat support components and timber section profiles Ribbon and Ribbon XL can be

combined to give many different bench and seat assembly types.

The standard Ribbon range consists of these coordinating products:

Ribbon Seat

Ribbon Bench

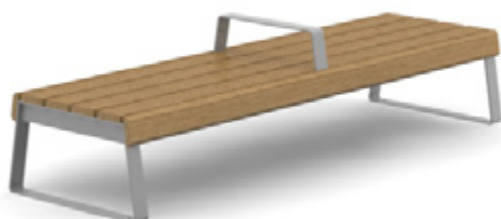

Ribbon Multi Seat

Ribbon XL Seat

Ribbon XL Bench

Ribbon XL Recliner

Transport.

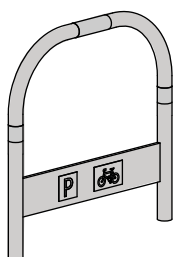

Functional bike parking

The Transport range of cycle stands incorporate a wide taper plate with integral cycle and parking logos. The range is available in polyurethane elastomer (PU) coated steel as standard, with galvanised. Polyurethane is durable material able to withstand the rigours of the outdoors as well as damage caused by cycle chains. In addition to providing an extra point to secure bicycles, the taper plate aids detection by the partially sighted.

- Available in **PU**
- Optional **tapper rail**
- Optional **parking logos** and **reflective tape**
- **Bolt-down** or **in-ground** options
- Made in the **UK**

Why Furnitubes.

- **Made in the UK**

our factory is based in Kent, so expect faster leadtimes and no supply chain delays

- **Easy to maintain + low labour costs**

we make sure that fixing points are easily accessible so slats and brackets can be changed easily when damaged

- **Modular solutions**

our ranges are modular and customisable, seating and planters can be easily combined, be creative without blowing the budget

- **Our approach**

we take a considered approach to design, it's not just about the end product. We take everything in the process into consideration, we are collaborative and we are committed to producing products that improve our environment & keep people safe.

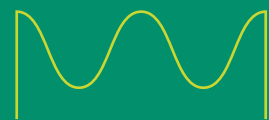

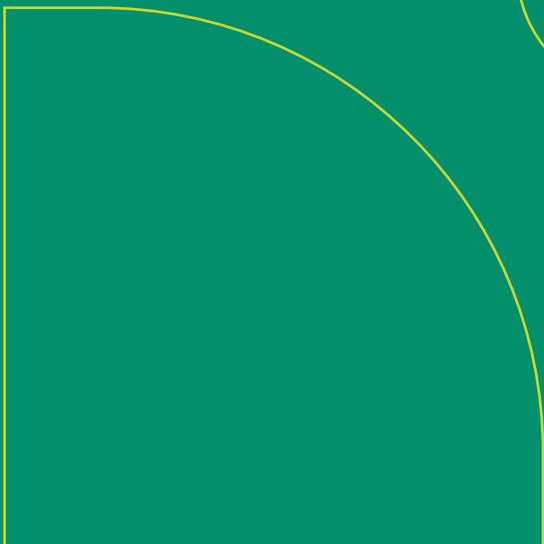

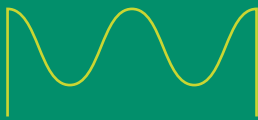

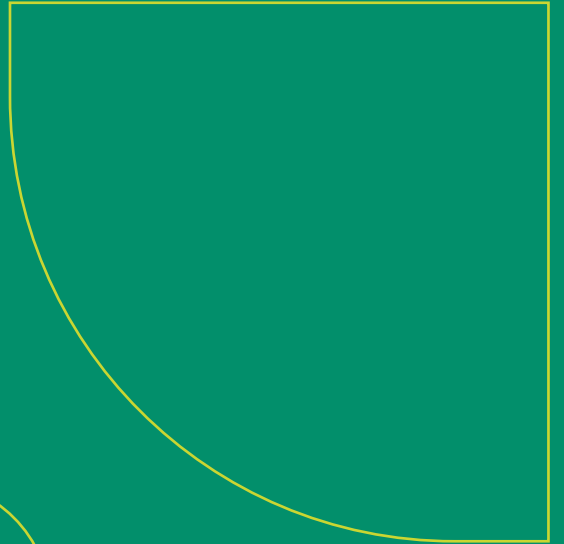

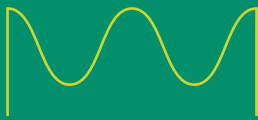

Our Process.

- **Get in touch** – it's as simple as that, give us a call or drop us an email, we're happy to help whatever the medium!

- **Collaborate** – Depending on your needs, you might not actually need us at this stage, that's the beauty of our modular ranges – they're designed with you in mind, so you can specify with ease. Nevertheless, we are here for you if you do – our design team are always on hand to discuss the nitty gritty of your project.

- **Specification** – This is where our team of experts take the wheel and help you with sketches, CADs and more to help you specify our products as easily as possible.

- **Production + delivery** – all of our products are designed and manufactured in the UK allowing us to give you shorter lead times. With a dedicated project manager keeping you in the loop, you can trust everything is in hand.
