

The choice of **sustainable timber** for outdoor installations.

Timber is one of the most versatile and beautiful materials for outdoor applications, but the **high carbon cost** of importing tropical hardwood is a significant factor for pivoting to locally-sourced materials.

Together, we'll explore sustainable, and beautiful, alternative timbers like our Endura™ range that can be used in outdoor installations, with a few thoughtful notes on how we've personally found the experience.

- **Learn** how **reclaimed wood** can be repurposed for a second life in modern landscape design.
- **Explore** the value in using **locally-sourced** Endura™ thermally-modified ash.
- **Understand** how **innovative timbers** such as Endura™ can be stress-tested for purpose.
