

## FIN RANGE CYCLE STANDS

### Distinctive design

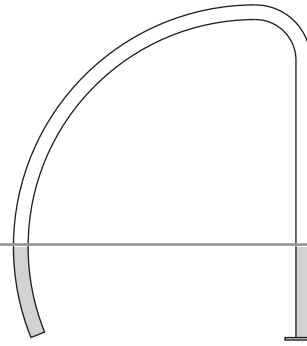

The Fin cycle stand is a Furnitubes' original design - inspired by the profile of a shark's fin breaking the surface of the ocean. The combination of this distinctive form and heavy duty steel sections make the Fin a much more prominent site feature than other simpler hoop designs. The range is available in a choice of two tube sizes - Ø48mm or Ø60mm - with either a root for in-ground fixing or a base plate for bolting down. Material options include galvanised or plastic coated mild steel, or stainless steel in grades 304 or 316, in a satin or bright polished finish. All versions are available with the addition of a decorative corner plate (with a hole) or a solid corner plate (without a hole), which can be used to apply graphics to.

## FIN RANGE CYCLE STANDS

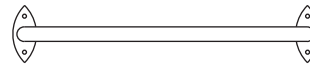

### Root fixed versions

The combination of a plated end to the straight leg and the curved tube assist embedment in a concrete foundation.

### Bolt down versions

Each leg has a base plate with 2 no. Ø13 holes for ground fixing.

**FIN** - Ø48mm tube size

#### FIN480

Galvanised steel, root fixed  
980mm wide x 800mm a/g  
x 300mm b/g

#### FIN480BASE

Galvanised steel, bolt down  
980mm wide x 800mm a/g

**FIN** - Ø60mm tube size

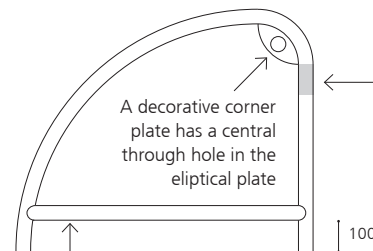

#### FIN600

Galvanised steel, root fixed  
1040mm wide x 800mm a/g  
x 300mm b/g

#### FIN600BASE

Galvanised steel, bolt down  
1040mm wide x 800mm a/g

### Corner plates, taper rail & reflective tape

A decorative corner plate has a central through hole in the elliptical plate

A flat corner plate is a solid plate to suit the application of graphics

A taper rail is a fully welded horizontal rail in the same CHS tube size as for the cycle stand hoop

Standard reflective tape is single band as shown, in various colour / reflectivity grade options

#### OPTIONS:

- Stainless steel in grades 304 or 316, in satin or bright polished finish
- Steel in black polyamide coating
- Steel in plastic coating - various colours
- Decorative corner plate, with or without holes
