

## HAMMERSMITH CYCLE STAND

### Heavy duty hoop stand with cross rail

As standard, the Hammersmith cycle stand is offered in a polyurethane elastomer (PU) material, formed around a strong inner steel core, with a two-pack polyurethane matt black finish. The outer PU covering is extremely durable and prevents damage from cycle chains. The cross rail strengthens the stand, offers more locking points and also assists detection by the visually impaired, complying with DDA guidelines. Reflective bands can be applied to the stand to further improve its visibility.

**Root fixed version**  
Inward facing plate on each leg aids embedment in concrete foundation

**Bolt down version**  
Base plate with 4 no. Ø20 holes for ground fixing

### HAMMERSMITH
