**A longstanding Furnitubes’ original design**

The original Zenith range combines a single-piece all-welded tough steel framework with seat and backrests infilled in a choice of materials and finishes. Steelwork is hot dip galvanised as standard (with the option of a supplementary polyester powder coated or plastic coated finish) or alternatively can be supplied in stainless steel, in various grades and finishes. Zenith straight seats and benches are offered in many different configurations as standard, and other special variations can be readily supplied on request. Complementary curved seats and benches are also available for the timber slatted version.

### Zenith seating: summary of seat slat size, material & finish options

Bench + 2 end arms
ZEN B8C
Bench + 2 centre arms
ZEN B8M
Bench + 1 mid arm
ZEN B8AC
Bench + 2 end & 2 centre arms
ZEN B8AM
Bench + 2 end & 1 mid arms
ZEN B8CM
Bench + 2 centre & 1 mid arms
ZEN B8ACM
Bench + 2 end, 2 centre & 1 mid arms
Modern materials and contemporary styling
This perforated all-stainless range is based on the framework of the original timber-slatted Zenith seating design, but with the seat and backrests supplied in perforated sheet panels. Available in stainless steel only, but in a choice of grades and finishes, this striking design is a popular choice in high profile public realm schemes - it is a high specification, high quality product that is built to last. As with all Zenith ranges, perforated seats are available in two standard length options, with various combinations of armrest positions, and as in-ground or bolt-down units. Tough welded-on anti-skate devices can be added to the horizontal front rails of seats and both sides of benches. Other variations to the standard units can be readily supplied on request.
### ZENITH® PERFORATED STAINLESS STEEL SEATS & BENCHES

Standard assembly: G304 stainless steel frame, seatings panels & posts for in-ground fixing, all in satin polished finish

#### SEAT - 3 person / 1830mm long
