

How to solve common issues with Steel planter walls.

"Practical solutions to complex issues that can be caused by not consulting/providing enough information about the project to suppliers at the outset and how this resulted in increased costs/time and unnecessary stress/complications was particularly useful for our projects"
WYG

What you will gain from this CPD

- Exploring Modular Solutions and its advantages over traditional planter construction
- Understand common problems associated with levels and clashes when installing modular planter beds
- Appreciate design considerations to overcome these problems
- Be able to specify modular solutions, with confidence, to your requirements

Duration: 40 minutes + Q&As
